

Project: Guidelines for Final Report

Each student must submit, through Moodle, a zip file containing the project report and code. The report must be comprehensive and provide design and implementation decisions in detail. More details about the files to be submitted are described in the following.

1. The final report must contain:

- A Cover Page
 - Include the course number and name, student name and email.
- Objective:
 - Sentences stating the objective of the project.
- Introduction:
 - Provide any necessary background information about the project so that someone outside of the class can understand your context.
 - In your own words, provide the requirements of the project.
 - State and discuss any assumption that your team made for project implementation.
- Analysis:
 - Detail your understanding of the requirements, or how to interpret them.
- Design:
 - Discuss how you planned to solve the problem.
- Implementation:
 - Discuss in detail what was implemented, what was partly implemented, and what was planned but not implemented. Moreover, discuss any problems encountered and difficulties faced.
 - Discuss any additional information you may find relevant for the understanding of the implemented code.
- Lessons learned:
 - What did you learn while working on this project? What would you do differently next time?
- Conclusion:
 - Briefly summarize your results (successes and otherwise). Highlight what was the most important concept(s) or issue(s) that you dealt with. Give a brief statement related to future work.
